

VETRITE[®]
tile

SICIS[®]

VETRITE[®] tile

Nascono i “piccoli” formati per offrire la possibilità di dare alle pareti una veste geometrica in un unico colore da scegliere tra le 25 tonalità proposte o in nuances di colori abbinata ai numerosi pattern per armonizzare ogni ambiente a discrezione del progettista.

La molteplicità dei formati rende facile la collocazione in svariate tipologie di ambienti che vanno dal semplice bagno, alle pareti cucina fino ad arrivare a strutture architettoniche importanti quali musei o grandi alberghi oltre alla possibilità di creare dettagli più contenuti all’interno di nicchie o di piccoli spazi espressamente immaginati su misura, dagli Interior Design per case o ambienti pubblici.

Sostituisce brillantemente carte da parati, stucchi di vario genere, materiali da rivestimento naturali e sintetici per abbracciare ogni stile e ogni nazionalità.

A variety of small formats conceived to create infinite geometric patterns for wall surfaces. Choose from one color to 25, combine sizes, colors and shapes to create truly unique wall murals.

The multiplicity of formats and its technical characteristics makes it easy to place in a variety of environments ranging from simple bathrooms to kitchen walls to major architectural structures such as lobbies, museums or hotels. The smooth surface is easy to maintain and clean.

The smaller formats allow application in diminutive spaces such as niches, highlighting and detailing interesting jewel box works of art.

A modern solution which brilliantly replaces wallpaper, stucco, natural and synthetic finishing materials for all styles and tastes.

CARATTERISTICHE TECNICHE

Technical Characteristics

DESCRIZIONE TECNICA DI VETRITE TILE

Vetro tecnico decorativo, ottenuto mediante la combinazione di polimeri in fase liquida, lamine metalliche e fibre tessili. Vetro composito versatile ad elevata tecnologia in grado di soddisfare i requisiti estetici, tecnici e ambientali più ambiziosi. Spessori 6 mm - su richiesta per applicazioni speciali può variare da 4 a 12 mm. Per uso a pavimento si consiglia lo spessore da 10 mm. con finitura SICISgrip*.

TECHNICAL DESCRIPTION OF VETRITE TILE

Thin glass slabs in large format made with an array of polymer films, thermofoil, metal foils or fiber textiles. Highly technical characteristics allowing for a multitude of applications. Thickness 6 mm – for special applications thickness from 4 to 12mm can also be available.

164 *For floor applications we suggest 10 mm thick with SICISgrip* treatment.*

VETRITE TILE E AMBIENTE

La versatilità della tecnologia Vetrite Tile consente, su richiesta, di fornire il prodotto anche partendo da vetri speciali pretrattati quali autopulenti, antibatterici etc...

I vetri speciali a pulizia facilitata sono caratterizzati da uno strato sottile e trasparente che ha proprietà fotocatalitiche e idrofile molto efficaci nel mantenere pulita la superficie. Lo strato fotocatalitico utilizza la doppia azione dei raggi UV della luce solare e dell'acqua per rimuovere lo sporco che si accumula sulla superficie del vetro.

VETRITE TILE AND ENVIRONMENT

On request, Vetrite Tile can be produced pretreated with a self-cleaning and antibacterial surface. This easy to clean treatment is characterized by a thin, transparent layer that has hydrophilic and photocatalytic properties which are very effective in maintaining a clean surface. The photocatalytic layer uses double action from UV rays from the sun and water to remove dirt that accumulates on the glass surface.

VALUTAZIONE DELLA QUALITÀ

Metodi di ispezione

Vetrite Tile deve essere osservata in una posizione verticale, ad occhio nudo e in normali condizioni di luce diffusa (naturale o artificiale, tra 300 lx e 600 lx), da una distanza di 1 m.

La direzione di osservazione è normale, cioè perpendicolarmente, alla lastra di vetro. L'uso di una fonte di illuminazione aggiuntiva, ad esempio riflettori, non è permesso.

QUALITY EVALUATION

Handling and Inspection

Vetrite Tile shall be inspected in a vertical position, with the naked eye and under normal diffused lighting conditions such as daylight (between 300lx and 600lx) from a distance of 1 m.

The use of additional lighting sources and/or spotlights is not acceptable.

FISSAGGIO DI VETRITE TILE - RIFERIRSI AL MANUALE DI POSA

L'installazione e la pulizia di Vetrite Tile devono essere idonei all'ambiente di destinazione.

Vetrite Tile può essere danneggiato, questo dipenderà in larga misura dall'ambiente in cui viene utilizzato.

Devono sempre essere considerate le seguenti raccomandazioni:

- I materiali di fissaggio utilizzati non devono essere di natura aggressiva.
- Quando Vetrite Tile viene inserito in profili, i bordi possono essere danneggiati da condensazione, agenti chimici (detergenti, ecc) che possono rimanere all'interno del profilo.
- La superficie e la massa del materiale del substrato a cui Vetrite Tile è fissato deve essere pulito, asciutto, privo di umidità, acidi, alcali e altri materiali aggressivi.
- Le istruzioni del produttore di adesivi, devono essere sempre seguite.
- Tutti gli adesivi e prodotti utilizzati devono essere compatibili con Vetrite Tile.
- La selezione e l'applicazione di adesivi/prodotti chimici, insieme con la scelta del substrato e preparazione per il fissaggio Vetrite Tile, è esclusivamente a discrezione e responsabilità dell'installatore.
- La selezione del detergente per la pulizia di Vetrite Tile, in base alla destinazione d'uso, è esclusivamente a discrezione e responsabilità dell'installatore.
- Sicis è disponibile ad assistere e suggerire gli installatori.
- Per i colori Antique e Antique Blue è necessario seguire le avvertenze di posa della collezione Colibri e ColibriTide presenti a pag 7 del Manuale di Posa SICIS Rev 8 Dic 2016.

INSTALLATION OF VETRITE TILE - REFER TO THE INSTALLATION MANUAL

General recommendations:

- *Vetrite Tile should be used in suitable environments and should be cleaned and maintained per suggestions.*
- *Vetrite Tile material should be handled with care.*

PULIZIA E MANUTENZIONE

Un'accurata e regolare operazione di pulizia non solo preserva le qualità estetiche delle superfici, ma ne mantiene anche inalterate le caratteristiche, asportando polvere e depositi aggressivi.

Le operazioni di pulizia devono essere eseguite manualmente o con idonea attrezzatura dall'alto verso il basso.

Vetrite Tile Collection è realizzata con diversi materiali con differenti caratteristiche e resistenze.

Si raccomanda in ogni caso di fare preventivamente un test di pulizia su una porzione limitata della superficie da trattare per verificare la compatibilità del detergente.

Non spruzzare il detergente direttamente sulla superficie del materiale, ma sul panno morbido e pulito.

Non utilizzare detergenti abrasivi e aggressivi.

CLEANING AND MAINTENANCE

A thorough and regular cleaning not only guarantees the exterior finish of the surface but also preserves its quality by removing dust and aggressive deposits. Cleaning operations must be done manually or by using suitable cleaning equipment from top to bottom.

Vetrite Tile Collection is made by several materials with different properties and resistances.

We recommend you to first try the cleaning product on a small portion of surface so to make sure that it will not be affected.

Do not spray the cleaning product directly to the surface but on a soft cleaning cloth.

Do not use abrasive or aggressive agents.

* SicisGrip è un trattamento in fase produttiva volta a creare una superficie antiscivolo conforme con lo standard ANSI A137.1 per DCoF

* SicisGrip is a treatment during production that creates a slip resistance surface and complies with the ANSI A137.1 standard for DCoF
